

Spider veins don't go with my outfit... or my outlook.

I want to look and feel my best. So when I developed spider and varicose veins, I made an appointment for a free screening at Englewood Hospital.

Now is *your* time to check unattractive spider or painful varicose veins at our free vein screening with a leading vein specialist.

The Center for Vein Disease at Englewood Hospital was the first in the nation to perform the newest, minimally invasive vein procedures, using ClariVein™ and VeinGogh™ to treat unsightly and problem veins – all on an outpatient basis.

For all vein problems, including visible varicose veins and blood clots, see our vein specialist.
